SUMMARY

Full Stack Engineer with 1.5+ year of professional experience building and supporting production web applications using React, Next.js, TypeScript, and REST APIs. Experienced in developing financial workflow applications, including admin dashboards, role-based access control, and multi-step approval systems for high-volume transactional data. Comfortable working across the application stack, from building responsive user interfaces and managing application state to integrating APIs, handling data validation, and optimizing performance for large datasets.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design,React Hook Form, Zod

State & Data: TanStack Query (React Query), Redux (basic), Zustand, Axios, REST API Integration

Performance: React Table, React Window (virtualization), Lazy Loading, Memoization

Access Control: Role-Based Access Control (RBAC), Maker-Checker Workflows, Secure Route Protection

Tools: Git, GitHub, GitLab, Postman

Backend *Node.js, Express.js, MySQL*

EXPERIENCE

Software Engineer — Trexo Fintech Pvt Ltd *2025 – Present*
Mumbai, India

- Independently developed and owned the admin panel for financial operations, handling high-volume transactional data end-to-end.
- Built scalable dashboards with filtering, search, pagination, and export functionality used by internal operations teams.
- Implemented maker-checker (dual-approval) workflows and role-based access control (RBAC) with secure route protection to meet financial compliance requirements.
- Managed API data using Axios and TanStack Query, implementing caching, background synchronization, and structured error handling to keep data consistent across views.
- Optimized rendering performance for large datasets using React Table and React Window (list virtualization), reducing UI lag on high-volume tables.
- Partnered with backend and product teams to define API contracts and workflow logic for new features.

PROJECTS

Admin Dashboard System for Financial Operations

- Built a scalable admin panel for financial workflows with filtering, search, pagination, and export.
- Implemented maker-checker (dual-approval) workflows with role-based access control (RBAC).
- Handled API data using Axios and TanStack Query with caching and state synchronization.
- Optimized large datasets using React Table and React Window (virtualization).

Tech: React, Next.js, TypeScript, Tailwind CSS, TanStack Query

Core Banking Workflow System

- Built frontend modules for core banking workflows, including transaction processing and multi-step approval flows.
- Designed role-based user flows with approval, rejection, and reprocessing states.
- Integrated APIs with proper state management, error handling, and real-time UI updates.
- Improved usability with clear state transitions, loaders, and edge-case handling.

Tech: Next.js, TypeScript, Tailwind CSS, Axios

EDUCATION

Masai School — Full Stack Web Development Program (Full-Time)

- 9-month intensive program covering frontend and backend fundamentals, JavaScript, APIs, and modern web development tools.

K.B.P. College of Engineering, Satara — Bachelor of Engineering \
